Grain Sampling Spear GSS2000

The GSS2000 is a two meter long grain sampling spear with 5 apertures to sample for quality and moisture.

The apertures can be opened and closed by turning the handle. Manufactured in aluminium. Sampling is where it all begins. Sampling is necessary to confirm that grain is suitable for continuous storage and to determine the quality.

TECHNICAL SPECIFICATIONS

- ◆ Material: aluminium.
- ◆ Length: 200 cm.
- ◆ Apertures: 5 pct.
- ◆ Inner diameter: 28 mm.

Digital Temperature Spear DTS2000

DTS2000 is a portable temperature measuring spear in 2,0 meter length with LCD display for handling the temperature. DTS2000 has one temperature sensor in the spear tip and one temperature sensor on the handle (in the display). Grain will be very warm post-harvest and this is ideal for insect breeding and biological activity. Grain is a very good insulator and loses heat very slowly. DTS is ideal for a quick test of the temperature in the grain.

TECHNICAL SPECIFICATIONS

- ◆ Length: 200 cm
- ◆ Measuring range: -10 °C to +70 °C
- ◆ Battery: disc battery type AG 13
- ◆ Display: Digital
- ◆ Sensors: 2 pcs.
